DESCRIZIONE

I relè differenziali di terra serie X...DL3 sono stati progettati per rilevare in modo intuitivo e automatico le correnti di fuga. La loro particolarità è quella di permettere un controllo continuo e immediato, attraverso il display multicolore, dello stato di isolamento.

Funzioni principali:

- ✓ indicazione digitale continua della corrente dispersa
- ✓ memorizzazione della corrente di intervento
- ✓ orologio interno (ore, minuti, giorno, mese) con memorizzazione ultimi 10 eventi
- ✓ uscita RS485 Modbus RTU, Misure, archivio eventi, oscilloscopio
- ✓ filtro in frequenza antifibrillazione selezionabile
- ✓ filtro in frequenza 3^a armonica selezionabile
- ✓ visualizzazione e misura THD
- ✓ misure in AC fino 2500Hz

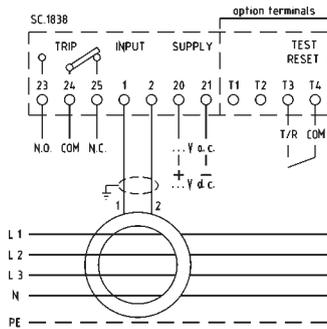

DESCRIPTION

The X...DL3 series earth leakage relays are designed to measure the leakage or unbalanced currents caused by conductors or appliances insulation losses and to react, in case the set limits are exceeded, switching off the power supply to the defective system. Thanks to their distinctive feature (the displaying of the leakage current) it is possible to continuously monitor the insulation state and to program the preventive maintenance in order to avoid unexpected power breaks

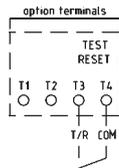

Main function:

- ✓ continuous digital indication of the leakage current
- ✓ storing of the intervention current values
- ✓ internal clock (hours, minute, day, month) and storage of the last 10 events
- ✓ RS485 Modbus RTU output, measurements, event archive, scope
- ✓ selectable antifibrillation filter
- ✓ selectable 3rd harmonic filter
- ✓ measure and display of the THD
- ✓ AC measurements up to 2500Hz
